

APA ITU SIPIMI?

Institut Molekul Indonesia (IMI) kini memiliki sistem baru bernama SIPIMI, singkatan dari Sistem Informasi Peneliti IMI. Melalui sistem ini, seluruh proses yang berkaitan dengan penelitian kini bisa dilakukan secara online dan lebih praktis. Bagi yang ingin mengajukan proposal penelitian, cukup mengunggahnya melalui SIPIMI tanpa perlu mengirimkan dokumen fisik atau email manual. Semua tahapan, mulai dari pengajuan proposal, proses review, hingga pelaporan hasil penelitian, dapat dipantau dan diselesaikan di satu tempat yang terintegrasi. SIPIMI dapat diakses melalui tautan berikut: **<https://researchportal.institutmolekul.id>**. Diharapkan dengan adanya sistem ini, kegiatan penelitian di IMI menjadi lebih efisien, transparan, dan mudah diakses oleh semua peneliti dan mitra kerja. Mari bersama-sama memanfaatkan SIPIMI untuk mendukung kemajuan riset dan inovasi di Indonesia.

KEUNGGULAN SIPIMI

1. Tanpa Dokumen Fisik
2. Seluruh proses dilakukan secara digital, tidak perlu lagi mencetak atau mengirim berkas manual.
3. Pemantauan Real-Time
4. Status proposal dan kegiatan penelitian dapat dipantau langsung melalui sistem.
5. Terdokumentasi Rapi
6. Semua data dan proses terekam otomatis, memudahkan penelusuran dan arsip.
7. Akses Fleksibel
8. Dapat digunakan kapan saja dan di mana saja selama terhubung dengan internet.

INTRODUCTION

The Indonesian Molecular Institute (IMI) now has a new system called SIPIMI, which stands for IMI Researcher Information System. Through this system, all processes related to research can now be done online and more practically. For those who want to submit a research proposal, simply upload it through SIPIMI without having to send physical documents or manual emails. All stages, from proposal submission, review processes, to reporting research results, can be monitored and completed in one integrated platform. SIPIMI can be accessed via the following link: <https://researchportal.institutmolekul.id>. It is hoped that with this system, research activities at IMI will become more efficient, transparent, and easily accessible to all researchers and partners. Let us work together to utilize SIPIMI to support the advancement of research and innovation in Indonesia.

ADVANTAGES OF SIPIMI

1. No Physical Documents
2. The entire process is conducted digitally, eliminating the need to print or send manual documents.
3. Real-Time Monitoring
4. The status of proposals and research activities can be monitored directly through the system.
5. Neatly Documented
6. All data and processes are automatically recorded, making it easy to trace and archive.
7. Flexible Access
8. Can be used anytime and anywhere as long as there is an internet connection.
